Blockchain innovations on ATS Market

Become part of the innovative ATS Market community and transform your business with blockchain!

DAO auctions

Participate in tenders where terms are determined by token holders

Decentralized expertise

Independent auditors record quality verification results in NFTs, eliminating data forgery

Smart contracts for automation

Automate payments, settlements, and fulfillment of obligations via smart contracts

NFT's for quality and origin verification

Every product can have a digital passport with information of its origin, quality, and storage conditions

Transaction security

All operations are recorded on the blockchain, eliminating fraud and ensuring transparency

Benefits of Tokenization

- Raise funds without intermediaries
- Increase asset liquidity
- Ability to sell shares in the business or inventory
- Develop new business models, such as staking and decentralized management

Legal Support

- 24/7 assistance in resolving legal issues
- All contracts and agreements are recorded on the blockchain, making them immutable and legally binding
- Obligation fulfillment is automated via smart contracts, eliminating disputes and delays
- Decentralized arbitration: disputes are resolved through token holder voting, ensuring fairness and transparency

Tokenization of goods and businesses

- Raise funds without intermediaries. Increase asset liquidity. Ability to sell shares in the business or inventory. Develop new business models, such as staking and decentralized management
- Every participant can issue a token for their enterprise, unlocking new opportunities for attracting investments and expanding their business
- Benefits of Tokenization

Cargo incurance, logistics & payments

Become Part of the Innovative ATS Market Community and Transform Your Business with Blockchain!
We invite insurers and logistics providers to join our platform to leverage advanced blockchain technologies for improving efficiency, transparency, and profitability in your business/

Why Should Insurers and Logistics Providers Collaborate with ATS Market?

Access to a Global Audience

Connect to an international network of suppliers and retailers seeking reliable insurance and logistics solutions

Enhanced Competitiveness

Use innovative tools to stand out in the market and attract more clients

Operational Optimization

Automate routine processes like calculations, payouts, and cargo tracking via smart contracts and NFTs

New Revenue Streams

Implement asset tokenization and participate in DAO auctions to attract investments and expand your services

Advantages for Insurance Companies

Reduction of Claims Processing Costs

Blockchain enables automation of claim verification and settlement processes via smart contracts, reducing time and administrative expenses

Increased Transparency and Client Trust

All data on insurance policies, payouts, and claims is stored in an immutable ledger, eliminating manipulation risks and boosting client trust

Fraud Prevention

Blockchain ensures reliable data verification, reducing the risks of insurance fraud

New Products and Services

Tokenization of insurance policies and the creation of NFT-based insurance products unlock additional monetization opportunities

Global Expansion

Integration with the international ATS Market platform allows insurers to enter new markets and attract clients worldwide

Benefits for Logistics Companies

Supply Chain Optimization

Blockchain ensures full transparency and traceability of cargo at every delivery stage, enabling route optimization and cost reduction

Automation of Settlements

Smart contracts automate payment and settlement processes between logistics chain participants, accelerating transactions and lowering operational costs

Reduction in Cargo Loss Risks

Blockchain technology allows real-time tracking of cargo location and condition, minimizing risks of loss or damage

Simplification of Documentation

All documents, including invoices, customs declarations, and certificates, are stored digitally on the blockchain, streamlining their processing and verification

Expansion of Client Base

Integration with the ATS Market platform grants access to a global network of clients, driving business growth

Blockchain Potential for Insurance and Logistics Companies

Blockchain is not just a technology — it is a tool for creating a new ecosystem where every participant benefits from:

Decentralization

Elimination of intermediaries and reduction in transaction costs

Transparency

All data is available in real time, fostering trust between participants

Security

Immutable data protection against tampering and cyberattacks

Innovation

Opportunities to implement new business models, such as asset tokenization and participation in DAOs

Join ATS Market and become part of the ecosystem where blockchain technologies open new horizons for your business!

Advertising features of the ATS Market platform

ATS Market offers a powerful toolkit for promoting your business, whether you are a supplier, retailer, insurance, or logistics company. Our platform enables effective engagement with your target audience using advanced advertising technologies and flexible solutions.

Targeted Advertising

Participate in tenders where terms are determined by token holders

Promotion via ATSCOIN

Pay for advertising campaigns in ATSCOIN and receive discounts

Packaged Campaigns

Choose ready-made advertising packages for maximum audience reach

General advantages

Prominent Banners

Place service ads on the homepage and key sections of the platform

Visibility Boosts

Raise your offers to the top of search results using boosts

Advertising in Categories and Sections

• For Insurers: Place offers in the ad block that appears during deal finalization
• For Logistics Providers: Promote services in the block shown when selecting a delivery method

Why Choose Advertising on ATS Market

Flexibility

Customize ads to meet your needs using targeting, boosts, and specialized blocks

Savings

Pay for ads in ATSCOIN and receive attractive discounts

Reach

Use package deals to maximize engagement with your target audience

Technology

Leverage cutting-edge tools to promote your business.
Join ATS Market and start effectively promoting your goods and services today!

60% — 126 000 000
Stakers, investors, partners

40% — 84 000 000
Team Token Lock-up: Until August 15, 2025

Tokenomics of the ATSCOIN project

- Burning: 20% of subscription fees are destroyed, creating a deflationary effect
- New Token Issuance: Not possible
- Account locking: none
- ATSCOIN is a digital asset with a fixed supply and transparent tokenomics. Token burns and team token lock-up ensure deficit and value growth. Join the ecosystem where technology works for your success!

Advantages for investors & partners

Invest in the Future of the B2B Market with ATS Market. ATS Market is not just a platform — it is an innovative ecosystem that unites wholesalers, retailers, insurance, and logistics companies using cutting-edge blockchain technologies. We are building bridges between the physical and digital worlds, unlocking new opportunities for business and investments

Why is ATS Market a Profitable Investment?

B2B Market Growth

The global B2B market continues to grow, and ATS Market offers a unique solution for optimizing and automating business processes. We are creating an ecosystem that becomes an indispensable tool for thousands of companies worldwide

Technologies of the Future

We integrate blockchain, smart contracts, and tokenization to make business processes transparent, secure, and efficient. This not only reduces costs but also opens new revenue streams for platform participants

ATSCOIN Token

ATSCOIN is already traded on exchanges and will be used within the platform for asset tokenization, participation in DAO auctions, and staking. This will create additional liquidity and attract new participants to the ecosystem

Global Expansion

We are actively expanding into international markets, attracting suppliers, retailers, and logistics companies from different countries. This opens new horizons for the platform's growth and scalability

Unique Business Models

We offer innovative solutions like business tokenization, decentralized governance, and collaborative logistics, which are becoming new standards in the B2B segment

High ROI Potential

By investing in ATS Market, you become part of a rapidly growing ecosystem with immense potential for monetization and scaling

Transparency and Security

All platform operations are secured by blockchain, ensuring full transparency and eliminating fraud risks

Access to Exclusive Opportunities

Partners and investors gain access to unique tools like DAO auctions, asset tokenization, and decentralized governance

Participation in Ecosystem Development

You can influence the platform's evolution through token holder voting and proposing new features

Roadmap

ATS Market is not just a platform — it is an innovative ecosystem that unites wholesalers, retailers, insurance, and logistics companies using cutting-edge blockchain technologies. We are building bridges between the physical and digital worlds, unlocking new opportunities for business and investments.

Q2-Q3 2025: Preparation and beta launch

Actively signing contracts with suppliers, retailers, insurance, and logistics companies

Q4 2025: Full version launch and scaling

Opening access to all interested participants. Integrating ATSCOIN into loyalty programs and partnering with retailers. Expanding functionality: decentralized arbitration and fractional asset ownership

2026: Ecosystem development

Asset tokenization, ATSCOIN staking, DAO auctions. Implementing new business models, such as decentralized governance. Hosting the annual ATS Market conference

How to join?

We are building the future of the B2B market, where technology works for you.
Join ATS Market and become part of an innovative ecosystem that unlocks new horizons for business and investments!
